## FACILITIES FOR INTERSTATE ACCESS

20 Optical Networking (Cont'd)

(T)

(D)

(D) Application of Rates and Charges (Cont'd)

(T)

(2) Optical Network Transport

(T)

The transport element provides for the interoffice Optical Network transport between wire centers on Telephone Company defined LANs. Each IC customer Connect must have its own transport. Transport cannot be shared among IC customer Connects.

Optical Network Transport may be provided as LAN-wide, LAN-wide Premium, Point-to-Point, or Ring Per-Mile Transport in bandwidth capacities of OC1, OC3, OC12, OC24 and OC48. J-SONET Transport may be purchased in DS0, DS1 or DS3 bandwidths. Band SONET Transport may be purchased in DS0, DS1, DS3, OC3 or OC12 Bandwidths. \*

(a) LAN-wide Transport provides transport between two or more Incremental SONET designated wire centers located on the IOF transport. LAN-wide Transport is provided at a non-distance sensitive flat-rated monthly charge per LAN traversed. LAN-wide Transport is not guaranteed. However, the customer will have protection routing topology. Multiple Connects served from any of the Incremental SONET designated terminating wire center on the LAN may utilize this element. LAN-wide Transport may be ordered as switched or special access.

(b) LAN-wide Premium Transport provides the same as LAN-wide Transport. Provisioning of LAN-wide Premium Transport provides a quicker restoral time. LAN-wide Premium Transport is provided at a flat-rated monthly charge per LAN traversed. LAN-wide Premium Transport may be ordered as switched or special access.

(c) Point-to-Point Transport provides transport between the serving wire centers associated with two CDLS. Point-to-Point Transport is provided at a distance sensitive rate on a per airline mile basis. Mileage is measured between the wire centers of the customer designated locations. Point-to-Point Transport may be ordered as switched or special access.

(d) Ring Per-Mile Transport provides distance sensitive transport on a ring topology. The transport is measured in airline miles from the primary serving wire centers of the customer designated locations. Ring-Per-Mile Transport may be ordered as switched or special access.

Ring Per-Mile Transport provides a service guarantee as shown in 2.4.4(A)(8).

(e) J-SONET Transport provides transport between the serving wire centers of the CDLS. J-SONET Transport may be provided at DS0, DS1 or DS3 bandwidth levels as required by the customer. The bandwidth of the transport must be the same as the bandwidth of the CO Connect or the payload, e.g., DS0 J-SONET requires a DS0 connect and DS3 J-SONET Transport requires a DS3 CO Connect. J-SONET Transport may be ordered as switched or special access.

J-SONET Transport is provided at a non-distance sensitive flat rated monthly charge per LAN traversed.

\* Grandfathered to existing service effective December 26, 1998

Issued February 18, 2000

## FACILITIES FOR INTERSTATE ACCESS

20 Optical Networking (Cont'd)

(T)

(D)

(D) Application of Rates and Charges (Cont'd)

(T)

(2) Optical Network Transport

(T)

- (f) Banded Optical Transport provides transport between the serving wire center of the interexchange access customer's location and the access customer's end user premises. Banded Optical Transport may be provided at DS0, DS1, DS3, OC3, E1, STS1, STM1 or OC12 bandwidth levels as required by the customer. Wholly provided Banded Optical Transport may also be provided at OC3c and OC12c bandwidth levels. When Banded Optical is ordered at a DS0 level, the customer must request a minimum of a DS1 interface at the IC customer wire center and will be charged for the appropriate rider (i.e., DS1 or DS3). Banded Optical Transport is provided with a service guarantee as shown in 2.4.4(A)(8). For subscription to Banded Optical Transport, the customer must have an accumulative demand requirement equivalent to an average of nine DS3s, i.e., 5,978 channels, per LATA. The bandwidth will be reviewed annually at a mutually agreed upon date by the customer and the Company. An allowance of minus 2% will be considered as having met the commitment level. Should the bandwidth fall below minus 2%, the customer will have thirty (30) days to meet the bandwidth requirement. If not met, the customer will be notified by the Telephone Company and will be required to convert from Banded Optical Transport to another Optical Networking Transport option.

Banded Optical Transport is provided at a flat-rated monthly charge for one (1) year, three (3) year, five (5) year, or seven (7) year Term Payment Plans (TPPs). The term period for Banded Optical Transport cannot exceed the term period of the Connect Banded Optical Transport includes the special access line from the end user serving wire center to the end user premises, for both on-net and off-net, with the exception of jointly provided Banded Optical Transport. Banded Optical Transport will be provisioned at the highest network facility available at the time of the order. The monthly rate will be determined based on the mileage between the serving wire centers of the customer designated locations and is applicable on a per circuit basis. Mileage will be rounded up to the next whole mile except when the CDLS are collocated.

When both customer designated locations are provided by the Telephone Company, wholly provided, the monthly rates as shown in 20(L)(66) are applicable. When one of the customer designated locations is provided by another telephone company, or the customer terminates at a multiplexer in a wire center on the IOF, jointly provided, the monthly rates as shown in 20(L)(67) shall apply. For jointly provided transport with another telephone company, the meet point billing mileage calculation is specified in Section 2.7.3.

Banded Optical Transport may be ordered as switched or special access.

(T)

(2) Optical Network Transport (Cont'd)

(T)

- (g) Expanded Band Optical Transport provides transport between the interexchange access customer's location and the access customer's end user location. Expanded Band Optical Transport may be provided at DS1, DS3, OC3, OC3c, OC12, OC12c, STS1, E1 or STM1 bandwidth levels as required by the customer. For subscription to Expanded Band Optical Transport, the customer must have an accumulative demand requirement equivalent to an average of nine DS3's, i.e. 5,978 channels, per LATA. The bandwidth will be reviewed annually at a mutually agreed upon date by the customer and the Company. An allowance of minus 2% will be considered as having met the commitment level. Should the bandwidth fall below minus 2%, the customer will have thirty (30) days to meet the bandwidth requirement. If not met, the customer will be notified by the Telephone Company and will be required to convert from Expanded Band Optical to another Optical Network Transport option.

Expanded Band Optical Transport is provided at a flat-rated monthly charge for one (1) year, three (3) year, five (5) year or seven (7) year contract periods at the rates shown in 20(L)(68). Expanded Band Optical Transport includes the special access line from the access customer's serving wire center to the access customer's premises and from the end user serving wire center to the end user premises. Expanded Band Optical Transport will be provisioned at the highest network facility available at the time of the order. The monthly rate will be determined based on the mileage between the serving wire centers of the customer designated locations and is applicable on a per circuit basis. Mileage will be rounded to the next whole mile except when CD's are collocated.

FACILITIES FOR INTERSTATE ACCESS

20 Optical Networking (Cont'd)

(D) Application of Rates and Charges (Cont'd)

(3) Payload

Payload is the customer service riding on the shared IOF transport and/or the activation of the service(s). Payload is provided at a flat-rated monthly recurring charge which includes add/drop multiplexing and is applicable at the wire center for each customer designated location, with the exception of CO Connects, Banded Optical Transport and Wholly Provided (T) Custom Connect. Payload services include DS1, DS3, OC3, OC3c, OC12, OC12c, STS1 and STM1. Payload services may be ordered as switched or special access.

The monthly rates for DS1 payloads are shown in 20(L)

\* Grandfathered to existing service effective December 26 1998

## FACILITIES FOR INTERSTATE ACCESS

20 Optical Networking (Cont'd)(E) Additional Node

An Additional Node can only be added to the Express Connect. The Additional Node provides the customer another wire center or customer designated location on the Express Connect. The Additional Node is provided as an electrical interface but can be added to a Express Connect that is either an electrical or optical interface.

When an Additional Node is added to Express Connect, the CDL of the Additional Node must be served from the same serving wire center or the same alternate serving wire center as the other Nodes (CDLs) on the Express Connect.

The Additional Node is provided at a flat-rated monthly rate and a nonrecurring charge which is applicable to the customer designated location(s) and may be ordered as switched or special access. After the initial order for Optical Networking, month-to-month rates shall apply.

The Additional Node must be ordered in the same bandwidth as the Express Connect.

(F) Incremental Growth

Incremental Growth facilitates a customer's growth in increments of OC3. Incremental Growth applies only to Connects and Additional Nodes.

Incremental Growth added to the Ring Connect must also be added for the Additional Node to maintain consistent bandwidth across the Connect. Incremental Growth may be ordered as switched or special access.

(G) Rate Regulations

Optical Networking may be ordered under a one (1), three (3), five (5), or seven (7) year Term, Payment Plan (TPP). Any TPP for these services is subject to an TPP Termination Liability Charge (TL) as specified herein.

When ordered together the TPP applies to Connects, Banded Optical Transport and Additional Nodes.

(1) Changes in Length of a TPP

Prior to the expiration of a TPP period, the customer may elect to convert to a new TPP (TL) period of the same or different length, subject to the following conditions:

- No credit will be given for the new period for payments made under the original TPP (TL) arrangement.
- NRCs will not be reapplied for existing services.
- If the new TPP period is shorter in length than the time remaining under the existing TPP, the change to the new TPP period constitutes a disconnect of the existing TPP (TL), service and termination liability charges will apply.
- The rates for the new period will be the rates currently in effect at the time of the change.
- If the customer subscribes to a new TPP which is greater in length than the initial (TL) TPP term and discontinues one or all of the service elements prior to the expiration (TL) of the new termination liability period, the termination liability as set forth below, will apply based on the remainder of the TPP period in effect at the time of (TL) the disconnect.

<u>Year in which Service Is Discontinued</u>	<u>Liability Rate</u>
1	100%
2	75%
3	50%
4 or more	25%

\* Grandfathered to existing service effective December 26, 1998

Director - Tariffs  
600 Hidden Ridge, Irving, Texas 75038

Issued February 18, 2000

## FACILITIES FOR INTERSTATE ACCESS

20 Optical Networking (Cont'd)

(T)

(D)

(G) Rate Regulations (Cont'd)

(T)

(2) Renewal Options

Ninety (90) days prior to the expiration of the existing TPP, the customer shall submit in writing to select a new TPP or disconnect service. If no notice is received, the Company will automatically reconnect the customer to a new TPP with the same term life as the previous.

After completion of the initial TPP term and the customer subscribes to a new term that is longer in length the termination liability, as set forth below, will apply based on the remainder of the TPP period in effect at the time of the disconnect.

<u>Year in which Service Is Discontinued</u>	<u>Liability Rate</u>
1	20%
2	15%
3	10%
4 or more	5%

(3) Conversion

When an existing customer purchases Optical Networking, the customer may upgrade their existing special access services to Optical Networking. The upgrade may require physical network changes, as well as changes to existing billing arrangements. Physical changes consist of reterminating existing services not currently utilizing the Optical network.

Termination liability charges will not apply to the customer's existing services provided the Optical Networking TPP term commitment agreement is equal to or longer in length than the time remaining for the existing arrangement.

(4) Rate Changes

The TPP rates are exempt from Telephone Company initiated increases for the length of the plan, however, decreases will be passed on to the customer. Rate changes may occur as a result of FCC action.

(5) Termination Liability

In the event the customer discontinues one or all of the service elements (Connect, Banded Optical Transport, Additional Node) prior to the end of the termination liability period, initial termination liability charges, as set forth below, will apply based on the remainder of the TPP period in effect at the time of the disconnect.

<u>Year in which Service Is Discontinued</u>	<u>Liability Rate</u>
1	40%
2	35%
3	30%
4 or more	25%

(6) Termination Without Liability

For Banded Optical Transport, termination charges will not apply when the customer disconnects a DS0 or DS1 on a circuit by circuit basis provided the required accumulative bandwidth is met as shown in 20(D)(2)(f).

(This page filed under Transmittal No. 1242.)

Director - Tariffs  
600 Hidden Ridge, Irving, Texas 75038

Issued February 18, 2000

## FACILITIES FOR INTERSTATE ACCESS

20 Optical Networking

(T)

(D)

(G) Rate Regulations (Cont'd)

(T)

(7) Upgrade to Higher Bandwidth

The Customer who has grown incrementally, may elect to upgrade service to a higher bandwidth during a TPP period to gain economic efficiencies. Termination charges will not apply as long as the upgraded service remains connected at the same point of termination(s) unless the network is being redesigned to gain network efficiency. Nonrecurring charges associated with the new bandwidth upgrade shall apply.

(H) Off-Net Wire Center

(T)

Off-Net wire center is a wire center not a designated Optical Networking wire center office. The customer may order a DS0, DS1, DS3 or E1 to the Off-Net wire center. Mileage charges will be determined based on airline miles to the nearest on-net wire center at the transport rates shown in Section 5.

Circuits connected to the Off-Net wire center will be billed existing tariffed rates as shown in Section 5.

(I) Shared Use

(T)

Shared Use is the provisioning of Switched Access over Optical Networking. Rating as Optical Networking will continue until such time as a portion of the available Optical Networking capacity is used to provide Switched Access service.

For shared use, a special access DS3 interface must be ordered between the IC customer and the IC customer wire center. When switched trunks are ordered, a DS1 switched interface must be ordered for the switched trunks. A DS3 or DS1 interface ordered as Switched Access will be used exclusively for Switched Access.

As individual channels are activated for Switched Access, monthly charges will be adjusted between Switched Access and Optical Networking Access based on the number of channels used for Switched Access and the remaining Optical Networking Access facility.

The total Shared Use for Switched Access charge is equal to the number of channels used for Switched Access divided by 24 for DS1 or 672 for DS3 times the Monthly Switched Access Charges. The monthly Switched Access rates used will be the current rates for Switched Access Entrance Facility, Direct-Trunked Transport Facility, Direct-Trunked Transport Termination and Multiplexer.

Following is an example of how Shared Use will apply to Optical Networking.

(T)

Single Route OC3 Connect - Electrical	\$4,100.00
Point-to-Point Transport - OC1 (10 Miles X \$160.00)	1,600.00
DS3 CO Connect	130.00
DS3 Payload	150.00
Total SONET Monthly Recurring Charge	\$5,980.00

Customer wants to utilize 850 channels for Switched Access DS3 with 10 miles of transport.

$$850/672 = 1.2 \text{ DS3s}$$

DS3 Direct-Trunked Transport Facility = \$67.44 X 10	=	\$ 674.40
DS3 Direct-Trunked Transport Termination	=	190.46
DS3 Entrance Facility	=	1,263.67
Total Monthly Rate per DS3		\$2,128.53

$$\$2,128.53 \times 1.2 \text{ DS3s} = \$2,554.23 \text{ Switched Access Shared Use Monthly Rate}$$
